

## August Nights

G            G7  
August nights  
G            G7  
northern lights  
C            G  
river runs slowly  
C            G  
timeless forever  
C            G            D  
my heart is only for you

days of past  
seasons last  
cool breezes blowing  
shadow of summer  
my love is growing hand in hand

### Refrain

hills of green  
summer scene  
flowers lay brightly  
meadows of color  
wind blows lightly through your hair

mountain side  
great divide  
forest that calls me  
mist covered valleys  
fire burns softly in your eyes

time moves on  
light of dawn  
geese fly from view  
toward endless tomorrows  
C            G            D            G  
I wonder if you'll still be mine

### Refrain

Am            Em  
I know the way home  
Am                            Em  
a road that's small and narrow  
Am                            Em  
light has been given  
C                            D  
for the days of my life
