

Lonely Hill

Em
Lonely hill
Am Em
dark of night
Em
band of men
Am Em
cower from sight

G Em
oh my heart
G Em
you must know

Em
soldiers march
Am Em
what night is this?
Em
Son of Man
Am Em
betrayed with a kiss

G Em
often times I've turned away
G Em
cares of life fill each day
G Em
worlds allure captures my heart
G
I turn to find that I've
F Em
betrayed my Lord

shadows move
the clamor of swords
voices raised
they arrest our Lord

oh my heart
you must know

an hour before
they'd fought and bled
all in the past
as naked they fled
on my own I take a stand
set my eyes on a new land
each time I struggle and fall
before the Lord I stand naked and small

fire burns
warmth for the soul
heart races on
don't let it show

oh my heart
you must know

accusations made
an utterance of lies
night cock crows
the look in his eyes

in my life how often I could show
your lasting grace the Love that I know
I hold back in silence and fear
I see your eyes, I see your tears
